

Sunovisio Corporation

OrderGridEnhancement Documentation

This guide will help you to install and configure order grid enhancement extension

Version 3.1.0
8/28/2013

Introduction

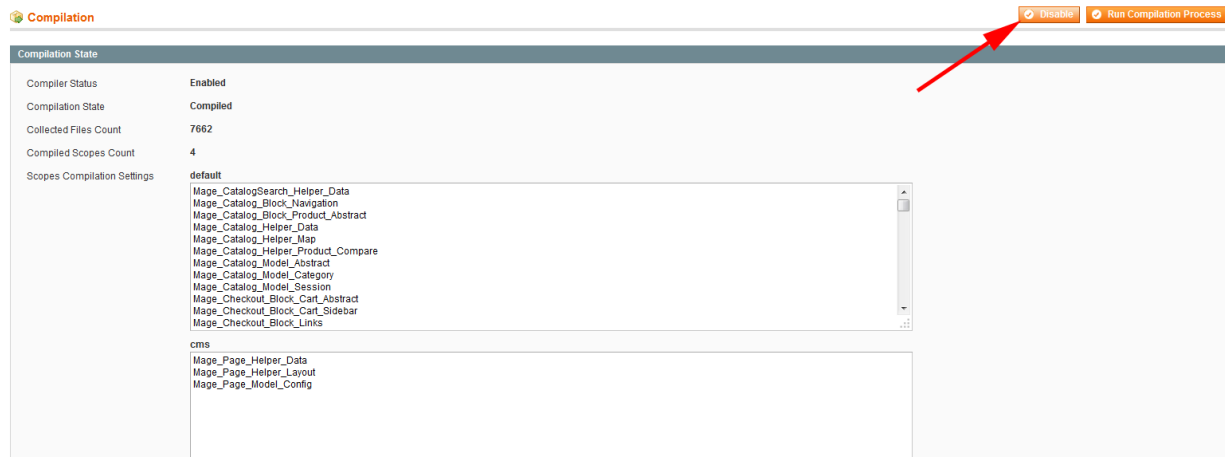

OrderGridEnhancement extension from Sunovisio will allow you to have a really better overview of your orders. We added to the grid, the product ordered, the payment and shipping method and the most important of all for us, some grid coloration totally configurable.

Some fast actions are also added in the grid allowing you to generate an invoice, to comment an order or even to cancel it.

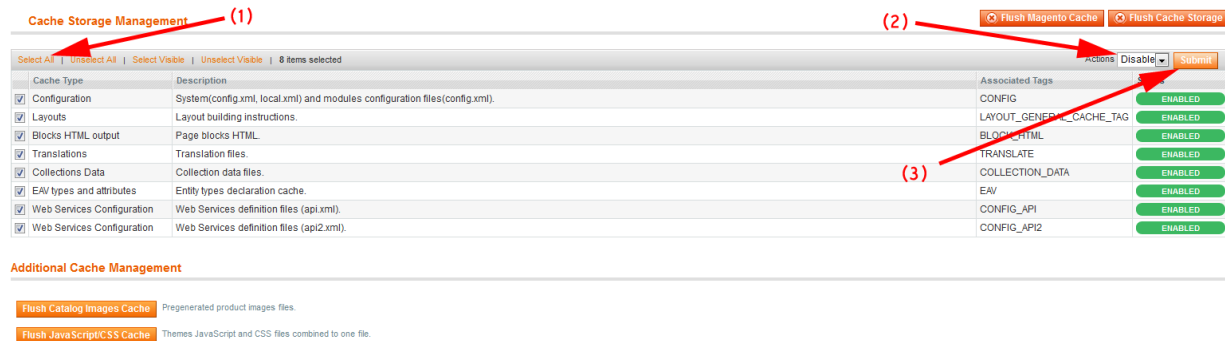

Installation

To install your extension, you first have to disable the Magento compilation feature and the cache.

For that, go to your Magento backend, and then in System > Tools > Compilation. If it is enabled, click on the “disable” button.

For the cache, go to System > Cache management. Click on the “Select All” link, select the “Disable” options and then click on the “Submit” button.

Depending on which version of Magento you are using, you will need to upload the content of the corresponding folder:

- Magento 1.5: Sunovisio_OrderGridEnhancement-3.0.1-Magento-1.5

➤ Magento 1.6 to 1.7: Sunovisio_OrderGridEnhancement-3.0.1-Magento-1-6-1.7

After uploading your file. Log out and Log in again.
Sunovisio Order Grid Enhancement Extension is ready to use.

Configuration

To configure your grid, go to System -> Configuration -> OrderGridEnhancement Extension.
The first tab “Sunovisio Help” gives you few informations about Sunovisio Company and how to get access support.

Support

If you have any problem with installing the extension, you can contact us via your account on <http://ecommerce.sunovisio.com> using the ticket system or the chat. You can use as well our contact email address contact@sunovisio.com or skype farge.loic.

Thanks for your trust in Sunovisio Corporation.

Troubleshooting

If you just installed the extension and when going on the order grid, you found an error like "Wrong content type". This is due to DHL and a bug from Magento as it doesn't have a default field in configuration. To correct the issue, go on System -> Configuration -> Shipping Method and save one time. The bug should be corrected. Find more information here:

<https://github.com/mageLTS/mageLTS/issues/74>
