

Sunovisio Company

Payment Method Per Product

This documentation will help you to install and configure Sunovisio Payment Method Per Product Extension very easily.

Version 1.1.0
7/15/2014

Introduction

Basically in Magento, payment methods are independent of items contained in your customer cart. With Sunovisio Payment Method Per Product Extension, you can easily disable some payment method depending on product, product categories or product attribute set.

Technical specification

The extension has been developed following Magento standard. It doesn't override any Magento base components to maximize compatibility with other extensions.

Language support

Sunovisio Payment Method Per Product has been translated in two languages:

-  French
-  English

Installation

To install your extension, you first have to disable the Magento compilation feature and cache. For that, go to your Magento backend, and then in System > Tools > Compilation. If it is enabled, click on the "disable" button.

To disable the cache, go to System > Cache management. Click on the "Select All" link, select the "Disable" options and then click on the "Submit" button.

You can now unzip your extension at the root of your Magento installation. After that, you need to logout of your Magento backend and login again. Check that you can access the extension configuration, and you can now re-enable the cache, and re-run the compilation process (don't just re-enable it, you have to re-compile). Here you are ! Your extension should be correctly installed.

Configuration Panel

The extension can be easily disabled directly using administration panel.
