Guide to install Sunovisio SMTP Pro Magento Extension

Version 3.5.0
9/22/2014

Introduction

This extension allows you to replace the normal mailing functionality of Magento by a mailing via SMTP connection.

Configuration of the extension

The extension requires you to configure the server SMTP information you want to use. For that, Go on “System”, “Configuration” and under the tab title “Sunovisio” click on the tab “Smtpro Extension”.

Sunovisio Help

The first tab “Sunovisio Help” will give you some general information about Sunovisio support.

Parameters

The second tab “Parameters” will allow you to setup your general settings.

Parameters	
Enabled	<input type="text" value="Yes"/> [STORE VIEW]
Activate Debug Mode	<input type="text" value="No"/> [STORE VIEW]
Log Email	<input type="text" value="Yes"/> [STORE VIEW]
Send error reports to	<input type="text"/> [STORE VIEW]

- Enabled: allow you to enable or disable the extension.
- Activate Debug Mode: selecting “Yes” will not send the emails in real but will only log emails in the Log System.
- Log Email: set to yes if you want to log email in backend.
- Send error reports to: in case an email is not sent correctly in your application, an error email will be sent to this email.

Email 1

If you need only one SMTP connection, configure only this one. If you need several SMTP connections, configure like this one “Email 2”, “Email 3”, ...

Email 1	
Server choice	<input type="text" value="Other server"/> [STORE VIEW]
SMTP server	<input type="text"/> [STORE VIEW]
SSL	<input type="text"/> [STORE VIEW]
Port	<input type="text"/> [STORE VIEW]
Authentication type	<input type="text" value="Login"/> [STORE VIEW]
Username	<input type="text"/> [STORE VIEW]
Password	<input type="text"/> [STORE VIEW]
Send Email From	<input type="text"/> [STORE VIEW]

▲ If empty, username will be used as email sender

- Server choice: configure your SMTP using Google SMTP, Live SMTP or another server.
- SMTP server: your SMTP server
- SSL: choose from nothing, TLS or SSL
- Port: port which must be use depending on your SMTP server
- Authentication type : “Login” if your server requires a username and password (most of sSMTP servers do), “Anonymous” else.

- Username: your username
- Password: your password
- Send Email From: this field is used only for testing. If your username is different than your email sender address, fill this field with the sender email address.

Test your connection

The last tab, “Test your connection” will test all your SMTP configurations to check if you configure it correctly. When the testing is done and validated, the extension will save your configuration automatically so you don’t need to care of that.

The screenshot shows the 'Test your connection' interface. At the top, there is a header 'Test your connection' in a light green bar. Below it, a form field 'Send email to' contains 'loicf@sunovisio.com' and a '[STORE VIEW]' link. An orange button reads 'Test Connection Parameters Before Saving'. The interface is divided into sections for 'Email 1' and 'Email 2'. Each section has a title and a list of test results in green boxes with checkmarks. For Email 1, the tests are: 'Test 1 for Email 1: Connection with host' (successful), 'Test 2 for Email 1: Authentication' (successful), and 'Test 3 for Email 1: Email Template' (successful). A large orange 'Please wait...' dialog box is overlaid on the 'Test 3' result. Below the 'Test 3' result, a green box states 'Your configuration has been tested successfully for Email 1.'. For Email 2, the tests are: 'Test 1 for Email 2: Connection with host' (successful) and 'Test 2 for Email 2: Authentication' (successful).

You are done. Your SMTP connections has been done correctly. You can use your application as usual.

Mailing history

The extension will keep an history of all emails sent by the application. You can access this log throw “System”, “SMTP Pro mailing log”.
